## WHAT OTHERS SAY

"This course provides an excellent way for everyone to learn about the causes of their symptoms and figuring out the biological solutions to them. Andi has a wealth of knowledge and so many wisdom pearls, her teaching methodology allows for an essay understanding of the material and its application on our lives, which provides hope and healing, preventing and or diminishing unnecessary suffering. It empowers you to let go of the fear and to connect with the wisdom of the body to heal itself."

Elena Coello Jemmali - Psychologist - TN & FL

"The Advanced Beyond Holistic Medicine course is where I've gained the knowledge of this science as a complete system. I now see the disease process in a logical framework that answers so many questions which western medical schools have been unable to provide satisfactory answers to. I'm looking forward to gaining more knowledge through the Professionals course so that I can provide incredible value as a practitioner."

Eric Cunningham - Student - Indianapolis, IN

"We have taken many courses and participated in many learning spaces over the course of our lives and never has one course fundamentally changed our relationship with relationships the way this one (Psychoses & Constellations) has. We did this one together over the course of two months, and EVERYTHING in our lives, including our relationship with our kids, and the space between the two of us, has dramatically improved. If you're hesitating on taking this course, do not. It's worth every penny and will return greater dividends than you think you know!"

Ilana Grosten & Doran Smith - GNM Students and Community Organizers - Montreal

"The Psychoses and Constellations course has been invaluable in giving me a much deeper understanding of the Constellations and how to apply this information to my own issues and with clients. I will continue to go over the material because it is a lot to assimilate!"

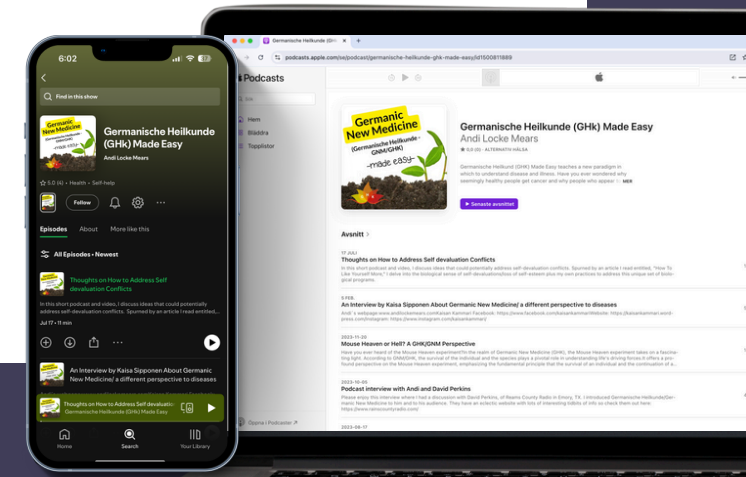

Julie Tilt - Health Coach - Eugene Oregon
