1. According to the latest immunological and serological studies, the overall lethality of Covid-19 (IFR) is at most 0.1% and thus in the range of a strong seasonal influenza (flu).
2. Up to 80% of all test-positive persons remain symptom-free. Even among 70-79 year olds, about 60% remain symptom-free. Over 95% of all persons develop mild symptoms at most.
3. The median or average age of the deceased in most countries (including Italy) is over 80 years and only about 4% of the deceased had no serious preconditions.
4. An article in the *New England Journal of Medicine* from May 2020 also comes to the conclusion that respiratory masks offer little or no protection in everyday life. The call for a mask requirement is described as an “irrational fear reflex”.
